

# Moodle 3.4 - New Features for Instructors

## Dashboard

New dashboard features allow users to view upcoming activities and activities ready for grading.

- Timeline tab allows users to view upcoming activities by date or course.
  - The dashboard will display the assignments that have submissions and the number of submissions ready to grade. Instructors can access the grading screen directly by clicking on the **Grade** link next to the activity.
- Course tab displays current, future, or past courses.

*Dates must be programmed in course activities for Dashboard notifications to appear.*

## "Grade by" reminders

- Create grade by reminders within activity settings. These reminders will appear on the dashboard timeline.

## Specify file types

- Acceptable file types can be specified for assignment submissions.

## Collapsible comments

- New collapsible comment feature for assignments allows users to collapse comments inside annotated documents making the original text easier to read.

## Activity completion management

- Bulk edit activity completion feature allows instructors to change completion requirements for one or multiple existing activities.
- Teachers can manually mark activities complete or incomplete for students.

## "Stealth" mode

- Activities and resources can be set to stealth mode so that they are available to students but not shown on the course page.

## Calendar

- New drag-and-drop function to update event dates
- Pop-up window for new events

## Moodle 3.4 - New Features for Instructors

### Private Files

- Private files storage will display users' used and available space.

### Activity Navigation

- New activity navigation allows users to navigate to the previous page, next page, or jump to a specific page.

### Participants Page

- Manage participants from a single screen.
- Filter by role, course status or group.
- Clearer view of course enrollment status.
