

# Moodle 3.4 - New Features for Students

## Dashboard

New dashboard features allow users to view course progress and upcoming activities in two new tabs: timeline and courses.

- Timeline tab allows users to view upcoming activities by date or course.
- Course tab displays current, future, or past courses.

## Emojis

- Emojis are now supported anywhere you can enter text.

## Calendar

- New drag-and-drop function to update user event dates.

## Private Files

- Private files storage will display users' used and available space.

## Activity Navigation

- New activity navigation allows users to navigate to the previous page, next page, or jump to a specific page.
